WARNING

This document contains classified information affecting the national security of the United States within the meaning of the espionage laws U. S. Code Title 18, Sections 793 and 794. The law prohibits its transmission or the revelation of its contents in any manner to an unauthorized person, as well as its use in any manner prejudicial to the safety or interest of the United States or for the benefit of any foreign government to the detriment of the United States. It is to be seen only by personnel especially indoctrinated and authorized to receive TALENT-KEYHOLE information. Its security must be maintained in accordance with KEYHOLE and TALENT regulations.

PREFACE

This report is one in a series on Soviet Ground Force and Logistic installations being prepared for a DIA/CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center (PIC DIA). The photographic analysis for this particular report was performed by the CIA Photographic Intelligence Division.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (J) equipment storage/maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank/assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training areas or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

### SUMMARY

The Omsk Training Area is located approximately 10 kilometers (km) south of the urban complex of Omsk, 8 km south-southeast of the railroad bridge over the Irtysh River and 2 km northwest of Stanitsa (Figure 1). The installation is not rail served. A probable hard-surfaced secondary road serves the major administration/barracks area.

The training area (Figures 2, 3, 4, and 5) encompasses an extensive area of approximately 11,170 acres. It contains a major administration/barracks area, two minor administration/barracks areas, one equipment storage/maintenance area, three general storage areas, four closed-circuit wheeled/tracked-vehicle driver-training courses, seven small-

arms firing ranges, and one tank assault gun range.

The training area contains a total of 187 buildings: 44 administration/barracks buildings, 29 general storage buildings, 19 equipment storage/maintenance, and 32 support buildings and 63 unidentified buildings. 25X1D

The installation cannot be identified from its initial coverage in [REDACTED] because of heavy clouds and incomplete coverage. There has been no apparent change in the installation since its initial analysis in [REDACTED]. The latest available photography, [REDACTED] reveals extensive track activity on the driver-training course and the tank/assault gun firing range. 25X1D

### DESCRIPTION OF INSTALLATION

25X1D

#### Road Service

A probable hard-surfaced, all-weather road serves the main administration/barracks facility. Numerous roads and trails interconnect the entire training area.

#### Administrative and Troop Housing Areas

Area D1 (Figure 3) appears to be secured by a single fence and contains 8 administration/barracks buildings, 6 storage buildings, and 7 support buildings.

Area D2, which appears to be occupied in both summer and winter, contains 36 probable barracks and 19 probable support buildings.

#### General Storage Areas

Area E1 (Figure 3) is secured by a fence and contains three probable storage buildings and three possible support buildings.

Area E2 (Figure 5) contains nine storage

buildings within a fence and one support building outside the fence.

Area E3 (Figure 5) contains 10 storage buildings and is secured by a fence.

#### Other Buildings

Area H1 (Figure 5) contains approximately 35 small buildings scattered throughout a wooded area. This area appears to be an old barracks area and contains two small-arms ranges and one athletic field.

Area H2 has 20 buildings of an undetermined type. The function of this area cannot be determined.

#### Equipment Storage/Maintenance Area

Area J (Figure 3) contains eighteen 170-by-60-foot equipment storage buildings and one maintenance building. Heavy scarring is present in this area on both summer and winter photography.

**Athletic Fields**

Area K (Figure 3) is a probable assembly area.

Area K2 (Figure 5) is an athletic field but does not appear to be active.

**Small-Arms Firing Ranges**

There are seven active small-arms ranges (Figure 5): L1 is 155 by 90 feet, L2 is 185 by 90 feet, L3 is 185 by 90 feet, L4 is 250 by 120 feet, L5 is 775 by 90 feet, L6 is 375 by 75 feet, and L7 is 375 by 75 feet. Scarring is observed on summer photography and probable scarring is observed on winter photography. Measurements are only approximations due to poor-quality photography.

**Driver-Training Areas**

M1, M2, and M3 (Figure 5) are tracked-

vehicle, closed-circuit driver-training courses.

**Tank/Assault Gun-Firing Range**

N1 (Figure 3) is a 4,000-foot tank/assault-gun firing range with nine targets and six lanes approximately 2,300 feet long. All lanes appear active and three may also be used in winter. Three range support buildings are located at the range head.

**Unidentified Facilities**

Area T1 (Figure 5) is a large concentric earth mound located southwest of the principal military administration-barracks area. Two possible buildings are located within the arc. It is connected by a trail to the road network.

Area T2 is an unidentified firing lane. Track activity is observed adjacent to the small-arms ranges, L1 through L5.
